

Abstract Workflow Node (Operation)	Input(s)	Output(s)	Implementation
count null data	dataframe	null counts	own implementation
delete column with no data	dataframe, threshold value	dataframe	own implementation
separate categorical and numerical data	dataframe	categorical and numerical column names	own implementation
drop column with zero threshold	dataframe, threshold value	dataframe	own implementation
apply one-plus log transformation	dataframe, column names	dataframe	own implementation
plot categorical variables	dataframe, columns	plot	own implementation
plot sales vs quality of the properties	dataframe	plot	own implementation
plot correlated variables	dataframe	plot	own implementation
model evaluation	model name, models, dataframe	dictionary with results of different metrices	own implementation
